David Chemical 0310000000 - Cook Case No. 94-04 August 18, 1993

On August 18, 1993, I conducted a sampling inspection at David Chemical located at 4650-4 W. 5th Avenue, Chicago, Illinois. I was accompanied by Sgt. Ronald Schlossberg of the Illinois State Police. No representative of David Chemical was present, the site appeared to be closed.

The following samples were taken:

Sample X201 was taken from the southeast corner of the facility by a bay door, from the sidewalk. Sample X201 consisted of a wet soil mixed with a green liquid which was observed seeping onto the sidewalk. Sample X201 was analyzed for TCLP Barium, Cadmium, Chromium, Lead, and pH.

Sample X202 was taken from the southeast corner of the facility by a bay door, from the sidewalk. Sample X202 consisted of a green liquid which was observed seeping from the facility towards the sidewalk. Sample X202 was analyzed for TCLP Barium, Cadmium, Chromium, Lead, and pH.

The samples were sealed with evidence tape and proper chain of custody was maintained. On August 18, 1993, the samples were transported to the IEPA-Chicago laboratory for analysis.
